International Degree Program in Animal Vaccine Technology

Unlock a world of opportunities with our cutting-edge program focused on animal vaccine development. International Degree Program in Animal Vaccine Technology at NPUST blends scientific research, vaccine innovation, and training to equip you with the skills to tackle major global challenges—disease prevention, zoonotic threats, and food security. Learn from experts, access cutting-edge labs, and engage in collaborative research that directly impacts the livestock, wildlife, and veterinary industries. Become a leader in animal vaccine innovation and join the fight to protect both animal and human health worldwide.

Learn from global experts, including renowned professors from around the world including; **Dr. Martin Ryan, University of St Andrews, UK**

Dr. Xin Zhao, McGill University, Canada

Dr. Peter Rottier, Utrecht University, Netherlands

Dr. Biao He, University of Georgia, USA

Dr. Wan-Keung Wong, Hong Kong University, Hong Kong

Dr. Etsuro Ito, Waseda University, Japan

Dr. Raadan Odbileg, Institute of Veterinary Medicine, Mongolia

In collaboration with these esteemed experts, we have developed a comprehensive curriculum taught entirely in English, designed to provide thorough training in the research and manufacturing of a wide range of animal vaccines. The program covers all stages of vaccine development, from concept to production, ensuring students are equipped with the skills needed to excel in this critical field.
